LISTE DES REVUES ACADEMIQUES

juillet 2011

Classement des revues d'HEC

Le classement des revues d'HEC est le résultat d'un processus complètement transparent combinant avis d'experts externes, classements existants, facteurs d'impact et examen des revues à classer. L'ensemble de ce processus est résumé en annexe et est décrit dans une note de méthode accessible au public et donc reproductible par toute personne disposant des mêmes informations.

Cette liste comprend la plupart des revues en gestion et en économie répondant aux objectifs d'HEC en tant qu'institution académique. Elle inclut, en outre, des revues d'autres disciplines, comme la psychologie ou la sociologie, afin de signaler la pertinence de ces publications pour HEC. De même, il va de soi que les recherches publiées dans des ouvrages, ainsi que les ouvrages de recherche relèvent également de la mission de l'école.

Annexe 2 - Méthode

Globalement, l'objectif était de trouver un algorithme visant à combiner les différentes sources d'information de façon uniforme entre toutes les revues de tous domaines. Parmi ces sources figuraient des avis de spécialistes (sollicités à l'extérieur d'HEC), des classements existants et des facteurs d'impact de revues. Les cas limites faisaient ensuite l'objet d'une discussion approfondie avant d'apporter des corrections éventuelles. Toutes ces corrections ont été réalisées en fonction d'informations factuelles supplémentaires (par exemple, taux d'acceptation ou encore évolution des facteurs d'impact).

Voici les cinq classements existants qui ont été utilisés :

ABS — Association of Business Schools Academic Journal Quality Guide

CNRS — Centre National de la Recherche Scientifique (2008), section 37, Économie et Gestion

ERIM — Erasmus Research Institute of Management Journals Listing (2006)

FT— Financial Times Journal List (2010)

VHB — Verband der Hochschullehrer für Betriebswirtschaft (2008)
